

MCRF

Marshfield Clinic Research Foundation (MCRF), the largest private medical research institute in Wisconsin, is accepting applications for its annual summer internship program.

The Internship

- A 12-week mentored, hands-on research experience working with an Epidemiologist on an analytic project in cancer, cardiovascular disease, diabetes, obesity, infectious disease, vaccine safety, or health services research, depending on the interests of the student and available projects.
- The student's role in the project may include conducting literature reviews, contributing to study design, collecting and analyzing data, and preparing a manuscript.
- Students will prepare an abstract describing their research and present orally at the annual Research Symposium.
- Opportunity to be involved with other epidemiology projects including the US Flu Network, Vaccine Safety Datalink, Marshfield Epidemiologic Study Area, and the Health Care Systems Research Network.
- Student project may serve as a capstone project or thesis.

Past Epidemiology Intern Projects

- The Reliability of Clinical Adjudication Panels in the Longitudinal Study of Implantable Cardioverter Defibrillators
- School Absenteeism among School Aged Children from Influenza and Other Respiratory Viruses
- Attitudes and Beliefs about Human Papillomavirus Vaccine among Adolescents and Parents in North-Central Wisconsin

Qualifications

- Currently enrolled in a Master's program in a health related field.
- Coursework in epidemiology methods and biostatistics, excellent written and verbal communication skills.
- Prior experience with statistical software preferred.

Compensation

- Housing and hourly wage of \$16/hour

"The internship provided a high quality, practical experience with epidemiologic data and afforded me the opportunity to apply my SAS programming skills to real-world data."
