

Marshfield Clinic Research Institute

Marshfield Clinic Research Institute, a division of Marshfield Clinic, was founded in 1959 and today is the largest private medical research institute in Wisconsin.

Mission

We enrich lives through discovery, translation and application of scientific knowledge that improves health and wellbeing.

About Us

Marshfield Clinic Research Institute is pioneering health care research – discovering new knowledge and innovative approaches to better meet the needs of patients at Marshfield Clinic Health System and around the world. We are embarking on a unique journey focused around integration and translation of medical research to improve health care. It is comprised of nationally-recognized centers in the fields of:

- Cancer research
- Epidemiology and population health
- Precision medicine
- Oral and systemic health
- Agricultural safety and health
- Clinical trials in several medical sub-specialty areas

These centers are supported by shared research support offices:

- Integrated Research and Development Laboratory
- Office of Research Computing and Analytics
- Office of Research Support Services
- Research Compliance

Structure and Leadership

The Research Institute has an oversight board of 13 members that serves an oversight and advisory function. The Research Institute is led by its executive director, research center directors and an administrative leadership team.

Facts and Figures

- As one of the largest private research facilities embedded within a regional, integrated health care system, the Research Institute is uniquely positioned to conduct innovative, translational and applied research in a learning health system environment serving a large underserved rural segment of Wisconsin.
- More than 40 Ph.D. and M.D. scientists, 200 other staff and approximately 150 physicians and other health care professionals through the Health System are engaged in medical research. This led to more than \$39.7 million in externally funded projects in 2020.
- Our investigators have access to a dedicated Clinical Research Unit to conduct trials and an electronic health record containing coded diagnoses data back to 1960, with other coded data and digital documents back to the mid-1980s.
- We take pride in the communities we serve, which is why our staff actively participates in activities that bring science to schools, colleges and communities. Other community outreach activities include actively participating in clothing and food drives.
