

Marshfield Clinic Research Institute

Marshfield Clinic Research Institute, a division of Marshfield Clinic, was founded in 1959 and today is the largest private medical research institute in Wisconsin.

Mission

We enrich lives through discovery, translation and application of scientific knowledge that improves health and well-being.

About Us

Marshfield Clinic Research Institute is pioneering health care research discovering new knowledge and innovative approaches to better meet the needs of patients at Marshfield Clinic Health System and around the world. The Research Institute is comprised of nationally recognized centers in the fields of clinical trials, cancer research, epidemiology and population health, precision medicine, and agricultural safety and health. These centers are supported by shared research support teams in the laboratory, computing and analytics, sponsored programs.

Structure And Leadership

The Research Institute is led by its executive director, research center and office directors and an administrative leadership team. Additionally, an oversight board, of 13 members, serves an oversight and advisory function.

Facts And Figures

- Embedded within a regional, integrated health care system, the Research Institute is uniquely positioned to conduct innovative, translational and applied research in a learning health system environment serving a large underserved rural segment of Wisconsin.
- 220 staff including 45 Ph.D. and M.D. scientists and approximately 150 physicians and other health care professionals within the Health System engaged in medical research.
- More than \$36 million in externally funded projects in 2022.
- Our research projects have access to a CDC-certified biosafety level 3 lab, a dedicated Clinical Research Unit to engage with research participants, and an electronic health record containing coded diagnoses data back to 1960, with other coded data and digital documents back to the mid-1980s.
- We take pride in the communities we serve, which is why our staff actively participates in activities that bring science to schools, colleges, and the community through active participation in outreach activities such as clothing and food drives.
