

An updated framework for protecting the safety, health, and well-being of children who live on, work on, or visit our nation's nearly two million farms and ranches.

Safeguarding Children in Agriculture: National Action Plan

**Safeguarding Children
in Agriculture:**
A National Action Plan

2025

“The ultimate goal is to ensure safe participation of youth in agriculture.”

National Children's Center
for Rural and Agricultural Health and Safety

The National Action Plan provides:

- *Common vision*
- *Priorities*
- *Opportunities*

“There are benefits to growing up on farms and ranches. We also know that youth working in agriculture are seven times more likely to die on the job than their non-agriculture counterparts.”

Now is the time to act. Align your policies, programs, and practices with the updated National Action Plan to ensure that every child grows up safe, healthy, and supported—on and around the farm.

Scan the QR code to read more and learn how together, we can build a culture of safety that keeps pace with today’s agricultural realities.
